EDUCATION

Kongu Engineering College

Bachelor of Engineering in Computer Science and Engineering with 7.34 GPA

Erode , Tamil Nadu

Nov. 2021 – May 2025

Rasi International CBSE School

HSC : 83.6 Percentage

Namakkal , Tamil Nadu

May. 2020 – April 2021

Sri Vidya Mandir CBSE School

SSLC : 83.2 Percentage

Salem , Tamil Nadu

May. 2018 – April 2021

EXPERIENCE

Fullstack Developer

The Cloud Company

October 2024(current)

Physical

- Developing a **Enterprise** React and .NET application for '**UNILEVER**' to manage different format of data shared via sellers across globe regarding sale of product in a particular month
- Leveraging various React libraries for faster and efficient performance of the app to handle large chunks of data
- Gave a deep insight in React and its libraries for optimizing performance

Freelancing Frontend Developer

Air Magic Store

May 2024 – June 2024

Remote

- Developed a e-commerce website frontend with functionalities for **Air Magic Store**
- Utilized the React JS for efficient development, incorporating Material UI(MUI) to handle user interactions
- Collaborated with the team to produce a efficient and fast loading ReactJS frontend for the e-commerce application which sells customised photo frames for users

Freelancing Fullstack Developer

Jassmedia

June 2023 – Jul 2023

Remote

- Developed a landing page for **JASSMEDIA** company to showcase their work and company information
- Utilized the MERN stack for efficient development, incorporating Node.js and Nodemailer to handle user interactions

Freelancing Frontend Developer

Caliber Tech

March 2024 – April 2024

Remote

- Developed the front end for an **e-commerce** site using HTML, CSS, and JavaScript
- Participated in regular client meetings to ensure alignment with project requirements
- Collaborated with the backend team to ensure seamless integration
- Implemented responsive design principles to ensure optimal performance across various devices

PROJECTS

MacOS Portfolio | NEXT JS, TailwindCSS

October 2024 – November 2024

- Developed an interactive **Mac-OS** portfolio using Next JS and TailwindCSS
- Replicated key Mac-OS home screen functionalities in real time
- It has functionalities like terminal, browser, control center, notes etc

Disease Outbreak Prediction Using AI | MERN Stack

May 2024 – June 2024

- Developed a React-based website utilizing **Gemini AI** to provide real-time information on global disease outbreaks
- Integrated real-time disease updates from the WHO website
- Gained valuable insights into using APIs and applying AI to solve real-world challenges

Vehicle Management System | MERN Stack

February 2024 – February 2024

- Developed a Vehicle Management System for college vehicles, featuring notifications to drivers and VMS admin about the next service date via SMS

- Utilized **Twilio API** to send messages to the mentioned drivers via the website
- **Achieved 3rd place** in the Web-App event conducted by 'EHORYZON2024'

Placement Portal | *MERN Stack*

August 2024

- Developing a **Placement portal for colleges**, featuring resume shortlisting and filtering based on skills added in portal
- Utilized MERN stack for its faster and easier development

Infotube | *MERN Stack*

February 2023 – April 2023

- Developed a full-stack application based on the problem statement provided in **Smart India Hackathon 2023**
- Created an online integrated platform for students to submit and view project support documents of various university students
- Selected from an internal hackathon and submitted the project to SIH. Gained significant experience in teamwork and the MERN stack

3D Portfolio | *React.js, Three.js*

September 2023 – November 2023

- Created a prototype showcasing the integration of a **3D model** in React.js using **Blender, Spline, and Three.js**
- Brought a 3D immersive game world to the web platform, enhancing the understanding of orbit control and scene management

Netflix Clone | *MERN Stack*

January 2024 – January 2024

- Developed a comprehensive Netflix website clone to hone skills in **API fetching**, data posting, and component rendering across various pages
- Implemented backend APIs for handling email and password data using MongoDB with Node.js and Express
- Gained valuable insights into managing states and utilizing hooks effectively

Instagram Frontend Clone | *Next.js*

November 2023 – November 2023

- Developed the frontend of an Instagram social media application using **Next.js**
- Implemented basic frontend functionalities of Instagram using Next.js
- Gained valuable insights into state management and utilizing hooks effectively in Next.js

Elder To-Do List | *MERN Stack*

December 2023 – January 2024

- Developed a full-stack TO-DO list web application for elderly users
- Participated in **Google Hackathon at IIT Patna**, choosing and developing the application as a team
- Gained valuable insights into team management and working in a coordinated environment

3D Robo Website | *Three.js*

July 2024 – August 2024

- Developed a **3D model robot in Spline 3D** tool and integrated it into a web application using Three.js
- Utilized **Three.js Orbit Controller** to create 3D motions and interactions on the webpage
- Gained valuable insights into 3D modeling and Three.js Orbit Controller packages

TECHNICAL SKILLS

Languages: Java, C, JavaScript, HTML/CSS

Frameworks: React, Node.js, Next.js, Three.js

Developer Tools: Git, VSCode, Vercel, Netlify, Render, Canva

Libraries: Material-UI, Tailwind CSS, Redux, Zustand, React Flow, Tanstack, Mantine

Development AI's: ChatGPT, Bolt, V0, Claude

ACHIEVEMENTS

- **Runner** in MIT Chennai SAMHITA Web Development Event
- **Winner** in E-HORYZON'23 (Web/App Development)
- **Third** in E-HORYZON'24 (Web/App Development)
- **Selected for internal hackathon** in Smart India Hackathon 2023

LEADERSHIPS

- Team leader for **MIT Chennai SAMHITA** Web Development Event
- Team leader for **Smart India Hackathon 2023**
- Team leader for **E-HORYZON'23** (Web/App Development)
- Team leader for **E-HORYZON'24** (Web/App Development)
