

Artificial Intelligence Basics

Artificial Intelligence (AI) is a branch of computer science that enables machines to perform tasks that normally require human intelligence.

Types of AI

Narrow AI

General AI

Super AI

Machine Learning

Machine Learning is a subset of Artificial Intelligence that allows systems to learn from data without explicit programming.

Deep Learning

Deep Learning uses artificial neural networks with multiple layers to solve complex problems.

Applications

Chatbots

Healthcare

Finance

Self-driving Cars

Recommendation Systems

Image Recognition

Advantages

Faster decision making

Automation

Reduced human effort

Disadvantages

High development cost

Job displacement

Ethical concerns
